

Jonathan Withey, Director of Transformation and ESG, Planet Mark

“We are delighted to be working with DOC Cleaning to support their transition to net zero, as they prioritise decarbonisation and embedded sustainability into their company.

“Having achieved Planet Mark Business Certification for five years, it’s inspiring to see DOC Cleaning embark on the next pivotal stage of their sustainability journey and commit to net zero targets.

“Climate change is the defining issue of our generation and DOC Cleaning now has full visibility of their emissions portfolio to manage and reduce their impact. Planet Mark is proud to be supporting them on this net zero transition.”

DOC Cleaning set science aligned net zero targets

At DOC Cleaning we are proud to be taking decisive action in response to the climate crisis, and as part of this dedication to sustainable, responsible business practice, we are pleased to announce our net zero targets.

With support from the experts at Planet Mark we have set net zero targets aligned with the ambition to limit global warming to 1.5°C. We are looking to achieve net zero well in advance of the 2050 UK Government requirement.

DOC Cleaning is committed to achieving net zero Greenhouse Gas (GHG) emissions across the entire value chain by 2040 from a baseline year of 2022.

This commitment is further supported by a near-term target to reduce GHG emissions across the entire value chain by 64% by 2030.

Targets are inclusive of Scopes 1, 2, and 3 emissions and our Net Zero Transition Plan, in development with support from Planet Mark will demonstrate a pathway of decarbonisation.

In accordance with the principles of the Science Based Targets initiative (SBTi) Corporate Net Zero Standard, an organisation can be considered net zero

once it has reduced emissions across all three scopes by at least 90% of baseline.

We recognise that the path to net zero will demand immediate action, innovative solutions, and transformative change across our operations and beyond. We will need to dramatically reduce our Scope 3 emissions, which currently contribute to 99.4% of our carbon footprint, by successfully engaging with our suppliers.

Irrespective of the challenge, we are bold in our determination, and are prepared to invest in our net zero future through our partnerships, our processes, and our governance models.

Further Information: *The commitments outlined are based on a comprehensive evaluation report of DOC Cleaning’s scopes 1, 2 and 3 for baseline year 2021-22. If you wish to view a copy of our Carbon Measurement report, please contact Head of ESG for DOC Cleaning. Contact details are jeff.silver@doccleaning.com or visit our website at www.doccleaning.co.uk*

About Planet Mark: *Planet Mark is an internationally recognised sustainability certification which recognises continuous progress, encourages action, and builds an empowered community of like-minded individuals who make a world of difference.*

We are proud to announce that DOC Cleaning is working towards a net zero target of 2040.

Now that we have set climate-aligned net zero targets with Planet Mark, we will be considering decarbonisation with every business decision and engaging with all of our stakeholders.

We look forward to seeing what business transformation will look like over the next couple of decades.

Jeff Silver
